

## **DIGITAL SAFETY STORIES DISCUSSION POINTS**

**STORY: Go Around**  
**AUTHOR: Dr. Cathy Jaynes**  
**DATE OF STORY: April 2008**

1. How was AMRM or CRM utilized?
2. What were the factors that prevented a tragedy in this situation?
3. How would night vision goggles have affected this situation?
4. What makes a landing zone safe?
5. Could this happen with our fire department and EMS services in our area? How well are we educating field personnel to bring us in safely? What are our strengths and weaknesses in this area?
6. This story brings in some of the “human factors” that affect safety in any organization or situation. What person-level issues can you identify in this story?
