

DIGITAL SAFETY STORIES DISCUSSION POINTS

STORY: Breathless

AUTHOR: David Duncan

DATE OF STORY: February, 2011

1. What implications for personal survival kits does this raise and where should the kits be placed?
2. How serious do you take safety training?
3. What do you remember from past safety training?

Pilots:

1. How do you know that you're not descending during flight?
2. How often do you scan instruments?
3. Do you place more trust in yourself or in your instruments?

Administrators:

1. How strongly do you support your crews for safety enhancement?
2. Do you have systems in place to replace/relieve communication specialists?
3. How soon should someone return to work after an accident?
4. How should they be monitored?
